

MODEL CHRISTIAN COLLEGE

KOHIMA, NAGALAND

I consider myself immensely fortunate to be a part of the first Work Study Programme of Model Christian College. It was a whole new experience in itself. Simply put, it was exciting, educative and truly worth the time. Working during my off periods had helped me to utilize my time productively. Earlier I was worried about the hectic class schedule and time commitments but by and by, the responsibility helped me to be more efficient in bringing about a balance to my schedule. Eight hours a month was routine friendly and was hassle free. Plus, the little cash paid for the service gave me a sense of the “working and earning” experience, which was very rewarding. I have learnt a great deal from working under the supervision of the librarian and the nurse. With hands on experience, it has given me a better understanding on the working of the particular department. The whole experience was very fulfilling and I enjoyed being a part of the programme. “Work Study Programme” is a very thoughtful gift to the students of MCC. It is an opportunity one should not miss.

My experience under 'Work Study Program'

I am writing this to share my own experience under 'Work Study Program', an initiative undertaken by the college. I was one of the two selected candidates to join the program when I was in my B.A. 2nd semester. My duty commenced from September 2019 to March 2020. I was initially assigned to work at the college library and later on worked at the medical room and the administrative office too, for a short while.

My work assignments were carried out during my off periods. The working hours were made flexible to suit my regular academic routine so I was able to attend all my classes and fulfill my assignments without any clashes.

I got to know and connect with a lot of people through this program. I was pleasantly surprised to see how open, nice and friendly everyone was when I first started working.

This program helped me develop good work ethics. I also gained skills that may even take years to cultivate at a short amount of time. There were many aspects of this 'Work Study Program' which I got to enjoy which at the same time helped me build my personality in a positive way. There were times when I had to put my work first and make sure that I accomplish what needed to be accomplished. Helping, assisting, and learning new skills amounted to a great experience, which I will always treasure. It was overall a very interesting and helpful program.
